

# Highwood

<https://www.regionalhousingsolutions.org/municipality/highwood>

## Submarkets (What is a submarket?)

**97% of Highwood is in Submarket 2.**

Higher density urban and suburban, large households, high foreclosure/moderate vacancy, low/moderate income

**2% of Highwood is in Submarket 6.**

High cost suburban housing stock, low density, high income, aging

**1% of Highwood is in Submarket 8.**

Suburban 1980-99 housing stock, high/middle income, suburban, aging

Areas with a similar combination of these submarkets:

- |                |                 |                |
|----------------|-----------------|----------------|
| Albany Park    | Brighton Park   | Montclare      |
| Archer Heights | Cicero          | Portage Park   |
| Armour Square  | East Side       | Rogers Park    |
| Avondale       | Gage Park       | South Lawndale |
| Belmont Cragin | Hermosa         | Stone Park     |
| Berwyn         | Irving Park     | Summit         |
| Blue Island    | Lower West Side | West Ridge     |
| Bridgeport     | McKinley Park   |                |

Want to find housing data for your community? Download [U.S. Census housing data](#) and use the [Homes for a Changing Region data guide](#) to analyze it.

## Issues + strategies

Most communities have multiple submarkets within their boundaries. The issues facing each submarket as well as strategies tailored to address them are outlined below.

	<b>Submarkets with primary focus</b>
--	--------------------------------------

Issue	2	6	8
Accessibility and visitability			✓

## Submarket 8

Improving accessibility and visitability can prepare communities for a growing senior population. A growing senior population raises concerns about whether submarket 8 communities are prepared as accessible and visitable places to live. As new housing is built or current housing is rehabilitated, attention should be given to make sure that housing will address the present and future needs of this population. Some submarket 8 neighborhoods were built without important pedestrian infrastructure, like sidewalks and crosswalks. Figuring out how to retrofit such infrastructure into existing neighborhoods would also improve accessibility, as well as position communities to remain attractive as market preferences change.

### Strategies

#### Age-friendly neighborhoods

Communities should create local amenities that will appeal to people of all ages, from young families to seniors.

Communities should create local amenities that will appeal to people of all ages, from young families to seniors. A community can best meet its social and economic demands by having a healthy balance of people from all age groups. Nevertheless, municipalities need to plan for amenities that can attract and retain residents. Neighborhood parks, public spaces and community art spaces such as [Karcher Artspace Lofts](#) in Waukegan and those created by [Batavia](#), are only a few of the central elements of an age-friendly community. For seniors that want to live independently in the community, having access to services is vital. Municipalities should think about the development of senior housing/services complexes strategically, and ideally should locate them near transit stations and commercial areas. Such developments can be helped by specific transit oriented development ordinances like [Chicago's](#), which allow increased residential density and reduced parking requirements. [Sunset Woods](#) in Highland Park and [Thomas Place](#) in Glenview are great examples of developments that came to fruition because of strong collaboration between developers and municipalities. The Northwest Suburban Housing Collaborative's Handyman Program is an innovative senior service program that connects seniors to low-cost maintenance services and helps them to live independently in their homes. [Read more about age-friendly policies.](#)

#### Value of housing planning

Municipalities should invest in long-term planning to identify policies and tools that prepare its housing stock for the future.

Municipalities should invest in long-term planning to identify policies and tools that prepare its housing stock for the future. Via planning tools like the [Homes for a Changing Region Toolkit](#), municipalities can better understand current and future housing needs in their communities and develop strategies to move toward a more "balanced" housing stock. Around the region, communities have been drawing on the principles of accessibility and sustainability to create healthier and safer housing. Plainfield's experience in housing development is instructive as well as its [density bonus program](#), which provides an increase in residential density above a base level if a given development meets one or more of 15 village objectives. Community "buy in" regarding balanced housing is more likely to occur if a community creates a housing committee similar to those created by [Highland Park](#) and [Lake Forest](#). Municipalities that are interested in incorporating greater accessibility/visitability standards into new development or rehab of existing single-family homes should review Bolingbrook's

	Submarkets with primary focus		
Issue	2	6	8
accessibility/visitability requirements.			
Attracting younger families			✓

## Submarket 8

Communities have an opportunity to attract younger families by striking the right balance between affordable homes and amenities. Younger families generally need affordable starter home price points in order to become new homebuyers. Additionally, providing amenities such as walkable neighborhoods, parks, and open spaces can help meet the preferences of younger generations, such as increased interest in biking and walking and more compact home environments.

### Strategies

#### Age-friendly neighborhoods

Communities should create local amenities that will appeal to people of all ages, from young families to seniors.

Communities should create local amenities that will appeal to people of all ages, from young families to seniors. A community can best meet its social and economic demands by having a healthy balance of people from all age groups. Nevertheless, municipalities need to plan for amenities that can attract and retain residents. Neighborhood parks, public spaces and community art spaces such as [Karcher Artspace Lofts](#) in Waukegan and those created by [Batavia](#), are only a few of the central elements of an age-friendly community. [Learn more about age-friendly neighborhood strategies.](#)

#### Placemaking and marketing strategies

Communities should develop strategies to create greater neighborhood identity in order to encourage additional private sector investment.

Communities should develop strategies to create greater neighborhood identity in order to encourage additional private sector investment. Municipalities can make a concerted effort to enhance neighborhood character in Submarket 8 through strategic public investments such as neighborhood branding/signage, streetlights, sidewalks, etc. As noted before, adding pedestrian infrastructure to these existing neighborhoods will be particularly valuable. Public sector investment will likely signal to the private market a commitment to an area and make it more attractive for additional resources. [Learn more about placemaking strategies.](#)

#### Repurpose and redevelop property

Communities should evaluate existing zoning and take stock of existing infrastructure when making decisions about redevelopment.

Communities should evaluate existing zoning and take stock of existing infrastructure when making decisions about redevelopment. Overdeveloped and vacant retail areas can be rezoned for mixed-use developments or housing. When adding multi-family units near transit, municipalities should consider lower parking requirements to relieve congestion and encourage walkability. Mundelein's [Downtown Design Guidelines](#), Glenview's [Downtown Development Code](#), and Libertyville's [payment in lieu of required parking policy](#) are all great examples of how to create a more efficient built environment.

	Submarkets with primary focus		
Issue	2	6	8
Code issues	✓		

## Submarket 2

Finding a balance between too aggressive and too lenient code enforcement can be difficult. Development pressures in some parts of submarket 2 allow the market to either rehabilitate or replace older units with code issues. In other parts of submarket 2, where the market is comparatively weaker, communities struggle to find the right balance in addressing code issues. Too aggressive enforcement can lead to vacancy and reduced neighborhood stability because building owners cannot afford to make all the repairs. Too lenient enforcement can lead to households living in unsafe or unsanitary homes. Burdensome point of sale requirements may deter new investment in the community, and challenges with staff capacity can result in long waiting periods to complete required inspections. The results of either approach compound over time and can serve as a deterrent to future market-driven rehabilitation.

### Strategies

#### Rental unit monitoring and regulation

Effective municipal regulation, coupled with pro-active strategies and incentives, can improve rental quality and reduce problems.

Effective municipal regulation, coupled with pro-active strategies and incentives, can improve rental quality and reduce problems. With the number of rental properties in submarket 2, municipalities need to review the structure of their rental unit monitoring and regulation efforts to make sure that they are effectively maintaining the quality of the local rental stock in accordance with state law. Municipalities may want to consider implementing a performance-based rental regulation ordinance such as the one in place in the [Village of Addison](#). Municipalities may also want to point owners of multifamily rental property to the abundance of resources at the [Community Investment Corporation \(CIC\)](#) for financing, energy efficiency, and property management training. [Learn about best practice rental regulation strategies.](#)

#### Strategic code enforcement on vacant properties

Code enforcement departments should create targeted intervention strategies based on certain property characteristics.

Code enforcement departments should create targeted intervention strategies based on certain property characteristics. Municipalities must find the right balance in code-enforcement work. Too lenient enforcement can allow vacant and abandoned properties to blight a neighborhood. Too stringent enforcement can deter additional investment in a neighborhood. For example, some municipalities have reported that boarding vacant properties actually discourages neighborhood investment and the best strategy is to make a property appear occupied. Code enforcement departments should maintain vacant property to the best of their ability and issue priority property maintenance liens as necessary. Even sending a notice to a property owner that a priority lien will be issued may encourage an owner to pay past fines or start taking an interest in the property. However, it is important for code enforcement departments to also make a plan when it is clear that the owner of a property is no longer being responsive. Outlining a strategy to identify properties that may need more aggressive intervention is important. At a certain point when the owner is no longer responding it may be more cost efficient in the long run to intervene with a more aggressive strategy. Communities must be willing

	Submarkets with primary focus		
Issue	2	6	8
<p>to utilize the full arsenal of enforcement tools, including demolition or declaration of abandonment, if necessary. <a href="#">Learn more about strategies to deal with vacant properties.</a></p> <p><b>Utilize demolition, fast-track, and abandonment authority</b>  More aggressive strategies may be needed when owners become unresponsive.  <u>More aggressive strategies may be needed when owners become unresponsive.</u> When it is clear an owner of a vacant property is no longer being responsive, municipalities should consider more aggressive strategies. The Metropolitan Mayors Caucus and BPI's publication on <a href="#">Vacant Building Ordinances</a> provides detailed information and step-by-step guidance on abandonment, fast track demolition, and declaration of abandonment. Some south suburban municipalities have used their abandonment authority to take control of problem properties and then partner with the <a href="#">South Suburban Land Bank</a> to transfer ownership of these properties to responsible owners. The <a href="#">Village of Lansing</a> has been using abandonment petitions to gain control of vacant properties, reduce strain on municipal resources, and attract investment. <a href="#">Learn more about strategies to deal with vacant properties.</a></p>			
Community resistance		✓	
<p><b>Submarket 6</b></p> <p><u>Community resistance to change often stymies new housing options.</u> Local opposition to new housing options beyond the traditional large single-family home is strong. Submarket 6 communities can make it difficult to attract a diversity of housing options to the area. A few mentioned the value of strong political leadership in setting the tone for a desire of balanced housing types and acceptance of people from across the income spectrum.</p> <p><b>Strategies</b></p> <p><b>Community education</b>  Targeted efforts to build support for diversity of housing stock and people can help address community resistance.  <u>Targeted efforts to build support for diversity of housing stock and people can help address community resistance.</u> Many groups, including elected officials, government staff, non-profits, and citizens, have explored ways to build community support for new housing types and greater local diversity. Utilizing these models in submarket 6 can help address community resistance issues. <a href="#">Read more about the many different best practices.</a></p> <p><b>Encourage partnerships with place-based CDCs</b>  Developers that propose more dense housing options or affordable housing may be more likely to receive support if they can partner with a nonprofit community development corporation (CDC).  <u>Developers that propose more dense housing options or affordable housing may be more likely to receive support if they can partner with a nonprofit community development corporation (CDC).</u> CDCs are more likely to have a long-standing and trusted relationship with the local municipality. Elected officials and CDCs should consider meeting on a regular basis to discuss how they can work collaboratively to address local housing challenges and further develop a strong relationship and level of trust. Some areas of the region may lack a strong CDC network. Municipalities in these areas may want to evaluate</p>			

	Submarkets with primary focus		
Issue	2	6	8
<p>if they should encourage the development of a local nonprofit partner that can help meet local housing goals. When new proposals are developed, it will be helpful to reference the messaging guide developed through the Housing Illinois campaign. <a href="#">Learn more about community acceptance strategies.</a></p> <p><b>Establish a housing commission</b></p> <p>Having a local body dedicated to housing issues helps a community craft policies that specifically respond to area housing needs.</p> <p><u>Having a local body dedicated to housing issues helps a community craft policies that specifically respond to area housing needs.</u> The Housing Commission can spend time better understanding the community's housing challenges and vetting potential solutions before they are brought to a Village Board. Both <a href="#">Highland Park</a> and <a href="#">Lake Forest</a> are examples of communities that have utilized housing commissions.</p>			
Economic development implications		✓	
<p><b>Submarket 6</b></p> <p><u>The lack of housing options and low density in Submarket 6 may limit economic development opportunities.</u> Municipalities goals' around increasing retail options and fostering a vibrant business community in downtown areas may be limited by the lack of density in the submarket. Economic development may be further limited when area employers find it hard to attract and retain workers who demand different housing options beyond the traditional large, single-family home.</p> <p><b>Strategies</b></p> <p><b>Value of housing planning</b></p> <p>Housing planning can be used as a tool to address or prevent a serious mismatch between housing supply and demand for people at every stage of the life cycle.</p> <p><u>Housing planning can be used as a tool to address or prevent a serious mismatch between housing supply and demand for people at every stage of the life cycle.</u> In the midst of a strong market, it can be hard to find space to step back and think about overarching issues. Yet, communities that undertake local housing planning, such as that done through <a href="#">Homes for a Changing Region</a>, benefit from a clear vision of the types of housing needed by the community, and can be less reactive to new proposals.</p>			
Foreclosure	✓		
<p><b>Submarket 2</b></p> <p><u>Communities struggle to determine how best to deal with foreclosures.</u> Stakeholders raised concerns about the ongoing impact of foreclosures in submarket 2. The lingering effects depend on the proximity to other markets. Near stronger submarkets, like 3 and 7, foreclosures can be addressed more easily, with units often reoccupied, whether by owners or renters. In other areas, communities struggle to determine how best to deal with foreclosures. If not properly addressed, foreclosures can begin a neighborhood cycle of disinvestment. Prolonged disinvestment drives property abandonment,</p>			

	Submarkets with primary focus		
Issue	2	6	8
<p>resulting in demolition in many cases. While demolition may represent an immediate benefit to surrounding residents, high rates of demolition can also create new challenges by disrupting the fabric of the built environment.</p>			
<p><b>Strategies</b></p>			
<p><b>High priority property maintenance liens</b></p>			
<p>Municipalities should utilize priority liens to recover costs incurred for securing and maintaining abandoned residential property.</p> <p><u>Municipalities should utilize priority liens to recover costs incurred for securing and maintaining abandoned residential property.</u> Illinois law allows for priority liens for securing and maintaining abandoned residential property. The law applies to any type of permanent dwelling unit that has been unoccupied for at least 90 days and for which the municipality attempted to contact the owner(s) or the owner's agent(s) but was unable to reach anyone. It covers the removal of weeds, trees, bushes, grass, garbage, debris, or graffiti, and securing or enclosing the property. Liens obtained under this law are superior to all other liens, except taxes. Under this law, municipalities recover their expenses after taxes are paid but before the mortgage is recovered. Thus, municipalities will recover even when the value of the property is less than the value of the mortgage. If municipalities are maintaining vacant property in their community, they should be sure to go through the necessary steps to file a high priority lien on the property. The Metropolitan Mayors Caucus and Business and Professional People for the Public Interest's (BPI) publication on <a href="#">Vacant Building Ordinances</a> provides detailed information and step-by-step guidance on this process. <a href="#">Learn more about strategies to deal with vacant property.</a></p>			
<p><b>Housing counseling</b></p>			
<p>Communities should familiarize themselves with any HUD certified housing counseling agencies in their area and market their services to residents.</p> <p><u>Communities should familiarize themselves with any HUD certified housing counseling agencies in their area and market their services to residents.</u> <a href="#">Housing Action Illinois</a> provides information about housing counseling agencies across the region. Residents can get access to financial management and budget counseling, mortgage delinquency and default counseling, pre-purchase education, one-on-one homeownership counseling, rental information, fair housing guidance, rehabilitation programs, reverse mortgage counseling, homeless prevention support, predatory lending education, and foreclosure prevention options.</p>			
<p><b>Land banking</b></p>			
<p>Land banks can be used as a strategic tool to acquire problem vacant properties and convert them into assets.</p> <p><u>Land banks can be used as a strategic tool to acquire problem vacant properties and convert them into assets.</u> Land banks are governmental entities or nonprofit corporations that focus on the conversion of vacant, abandoned and tax delinquent properties into productive use and have proved to be a useful tool to help reinvent and revitalize neighborhoods. Most vacant and abandoned properties have many legal and financial barriers, such as years of back taxes and clouded title that make it difficult to attract investors. Land banks have the ability to hold land tax-free and clear title and/or extinguish back taxes, which can be essential when trying to attract buyers and investment. Land banks can work in partnership with municipalities to advance community-based goals. There are two successful examples of land banks in Illinois, in both the <a href="#">south suburbs</a> and <a href="#">Cook County</a>, and other areas of the region struggling with issues of vacancy and blight might consider the use of land banking as a tool in</p>			

Issue	Submarkets with primary focus		
	2	6	8
<p>their community. The <a href="#">Center for Community Progress</a> is a good starting point to learning about land banking. <a href="#">Learn more about strategies to deal with vacant property.</a></p> <p><b>Resource targeting</b>  Targeting resources can increase their impact.  <u>Targeting resources can increase their impact.</u> Submarket 2 neighborhoods often attract funding to address local issues because of evidence of distress, like more foreclosures and high levels of cost burden. To ensure those resources maximize impact, communities, program operators, and funders should explore how to work closely in targeting those resources, as was done by Evanston with its <a href="#">Neighborhood Stabilization Program</a> or Chicago with its <a href="#">Micro-Market Recovery Program</a>.</p> <p><b>Review regulations affecting real estate development</b>  Communities may want to review Point of Sale requirements in order to determine if they are discouraging investment in the municipality.  <u>Communities may want to review Point of Sale requirements in order to determine if they are discouraging investment in the municipality.</u> Burdensome Point of Sale requirements—the steps that a seller or purchaser must go through with a municipality to buy a sell or unit—can dampen market interest in a community. An internal audit of Point of Sale requirements that considers the time to complete the entire process may prove helpful. Communities may consider conducting a focus group of potential developers/investors to gather feedback on the requirements and how they can be improved. Municipalities want to be sure their process is efficient, and at times flexible, in order to encourage sales activity in the community.</p> <p><b>Strategic code enforcement on vacant properties</b>  Code enforcement departments should create targeted intervention strategies based on certain property characteristics.  <u>Code enforcement departments should create targeted intervention strategies based on certain property characteristics.</u> Municipalities must find the right balance in code-enforcement work. Too lenient enforcement can allow vacant and abandoned properties to blight a neighborhood. Too stringent enforcement can deter additional investment in a neighborhood. Growing senior population		✓	
<p><b>Submarket 6</b></p> <p><u>Older adults will demand new housing options and readily available access to transportation and services.</u> Submarket 6 communities will need to think creatively about how to address the needs of a growing senior population given that this area has the highest increase in residents over the age of 60. The lack of housing stock diversity may pose problems for seniors who wish to downsize and stay in the community. Communities will also need to consider how to address the needs of seniors who can no longer drive and will need access to new transportation options. Seniors are more likely to desire walkable neighborhoods that provide easy access to amenities and services.</p> <p><b>Strategies</b></p> <p><b>Accessory dwelling units (ADUs)</b></p> <p>ADUs may be ideal for seniors who want to downsize and be close to family members, or have caregivers live on the property.</p> <p><u>ADUs may be ideal for seniors who want to downsize and be close to family members, or have caregivers live on the property.</u> ADUs are independent housing units created within single-family homes or on their lots. These units can be a valuable addition to a community's housing stock, particularly in an area that has limited opportunities for infill. ADUs have the potential to assist older homeowners in maintaining their independence by providing additional income to offset property taxes and the costs of home maintenance and repair. Communities considering ADUs can reference the Atlanta Regional Commission's <a href="#">model ordinance language</a>. Partners for Livable Communities' <a href="#">A Blueprint for Action</a> also provides specific strategies for creating a successful ADU program and discusses senior-friendly housing ordinances, as well universal design and visitability. <a href="#">Learn more about senior housing strategies.</a></p> <p><b>Age-friendly neighborhoods</b></p> <p>Age-friendly neighborhoods are walkable, offer housing and transportation choices, as well as access to basic needs and amenities.</p> <p><u>Age-friendly neighborhoods are walkable, offer housing and transportation choices, as well as access to basic needs and amenities.</u> CMAP's <a href="#">Aging in Place whitepaper</a> has a variety of helpful strategies and notes that municipalities should focus on creating age-friendly land use and zoning policies that promote mixed use and allow a diversity of residential districts and housing types, such as allowing for multigenerational homes, cohousing, shared housing, and senior congregate housing. Communities should also accommodate diverse living arrangements, including: "Families of choice" (groups of</p>			

	Submarkets with primary focus		
Issue	2	6	8
<p>individuals who are not biologically related but live together and share a kitchen) and allow child and elder care in residential settings by allowing older adults and caregivers to reside together. The Illinois Association of Realtors also has a useful webpage with additional <a href="#">Senior Housing Resources</a> for local municipalities. <a href="#">Learn more about age-friendly community strategies.</a></p> <p><b>Home modifications and maintenance</b></p> <p>Implementing programs to help seniors with minor home repairs and safety modifications can help residents that want to age in place.</p> <p><u>Implementing programs to help seniors with minor home repairs and safety modifications can help residents that want to age in place.</u> Home modifications and maintenance are fundamental to keeping seniors safe in their homes. They can also be an effective way of reducing housing costs, and increasing affordability. There are a variety of assistance programs that a community can implement, which are outlined in Partners for Livable Communities' <a href="#">A Blueprint for Action</a>. Many communities in our region such as those in the Northwest suburbs operate <a href="#">handyman programs</a> to help seniors with small home repairs. <a href="#">Learn more about senior housing strategies.</a></p>			
Need for more diverse housing options		✓	✓
<p><b>Submarket 6</b></p> <p><u>Attracting new population segments and serving the needs of existing residents may prove challenging given the limited housing stock diversity in the submarket.</u> High housing values and incomes in Submarket 6 have resulted in stability in the housing market. However, municipalities in this Submarket may need to consider how to accommodate changing demand for housing options when trying to attract new segments of the population including young families and millennials, seniors who want to stay in the community, and local employers who want their employees to live near work. Municipalities will need to consider how to accommodate demand for a variety of housing options from these population groups, including smaller single-family homes, more compact development and multifamily housing. Interviewees also expressed concerns about Submarket 6 communities' ability to accommodate the needs of segments of the local workforce that may be housing cost burdened. Local opposition to new housing options, as well as more attainable housing from a cost perspective, is often strong and will present challenges to municipal officials. In addition, competition for, and cost of, land often make development of new housing options all the more challenging in Submarket 6.</p> <p><b>Strategies</b></p> <p><b>Affordability through reduced parking</b></p> <p>Reducing parking requirements can help to keep housing costs attainable.</p> <p><u>Reducing parking requirements can help to keep housing costs attainable.</u> In residential developments, higher sales prices or rents must support every additional parking space required by a municipality. The more parking required, the more expensive the development. If communities in submarket 6 are considering building new multifamily housing at affordable prices, reducing or eliminating parking requirements can help. In Chicago, the <a href="#">Transit-Oriented Development Ordinance (TOD)</a> reduces or eliminates parking requirements near transit while providing density bonuses for developers who take advantage of the provisions. Many believe that this has helped amplify the rental development boom in</p>			

	Submarkets with primary focus		
Issue	2	6	8
<p>strong markets like Logan Square and the West Loop, opening up previously undevelopable parcels for action. In <a href="#">Libertyville</a>, developers can cash-out their parking requirements, paying the village a fee in lieu of parking not provided on-site.</p>			
<p><b>Affordable housing trust fund</b></p> <p>An affordable housing trust fund can help to increase the production or preservation of affordable units within a community.</p> <p><u>An affordable housing trust fund can help to increase the production or preservation of affordable units within a community.</u> Municipal governments can establish dedicated sources of funding for affordable housing construction, acquisition and/or preservation, such as the fund created in <a href="#">Highland Park</a>.</p>			
<p><b>Demolition tax</b></p> <p>Revenue raised from a demolition tax can be used to create a fund for the creation, preservation, maintenance and improvement of affordable housing within a municipality.</p> <p><u>Revenue raised from a demolition tax can be used to create a fund for the creation, preservation, maintenance and improvement of affordable housing within a municipality.</u> In strong market areas experiencing a loss of affordability or starter homes, a demolition tax can help to create a dedicated source of revenue to fund affordable housing initiatives within a municipality. <a href="#">Evanston</a>, <a href="#">Highland Park</a>, and <a href="#">Lake Forest</a> all have implemented a demolition tax policy.</p>			
<p><b>Establish a housing commission</b></p> <p>Having a local body dedicated to housing issues helps a community craft policies that specifically respond to area housing needs.</p> <p><u>Having a local body dedicated to housing issues helps a community craft policies that specifically respond to area housing needs.</u> The Housing Commission can spend time better understanding the community's housing challenges and vetting potential solutions before they are brought to a Village Board. Both <a href="#">Highland Park</a> and <a href="#">Lake Forest</a> are examples of communities that have utilized housing commissions.</p>			
<p><b>Inclusionary zoning</b></p> <p>Linking the production of market-rate housing and affordable housing can help address the issue of housing cost burden.</p> <p><u>Linking the production of market-rate housing and affordable housing can help address the issue of housing cost burden.</u> Inclusionary zoning efforts naturally work well in strong markets. These policies either require or encourage new residential developments to make a certain percentage of the housing units affordable to residents at target income ranges. Many communities in the region have adopted inclusionary zoning ordinances, including <a href="#">Evanston</a>, <a href="#">Highland Park</a>, and <a href="#">Lake Forest</a>.</p>			
<p><b>Land trusts</b></p> <p>Land trusts can provide affordable housing in perpetuity by owning land and leasing it to those who live in houses built on that land.</p> <p><u>Land trusts can provide affordable housing in perpetuity by owning land and leasing it to those who live in houses built on that land.</u> Land trusts, like those operating in <a href="#">Chicago</a> and the <a href="#">North Shore</a>, are often an effective tool in helping preserve currently affordable units due to a land trust's unique ownership structure. When a land trust sells a unit to an owner, they only sell the improvements (i.e. the home), but not the land underneath.</p>			

	Submarkets with primary focus		
Issue	2	6	8
<p><b>Preservation and expansion of affordable housing</b></p> <p>Preserving housing units that are already affordable is especially important in strong markets.</p> <p><u>Preserving housing units that are already affordable is especially important in strong markets.</u> Any existing affordable housing already in Submarket 6 should be prioritized for preservation. Submarket 6 communities should explore strategies to ensure existing units remain in the long-term, in order to preserve residents’ access to opportunities such as good schools and jobs. <a href="#">Land trusts</a> have proven to be a useful preservation strategy. Similarly, the work in <a href="#">Albany Park</a> highlights the value of targeted work by local non-profits to preserve units in areas with rising prices.</p> <p><b>Value of housing planning</b></p> <p>Housing planning can be used as a tool to address or prevent a serious mismatch between housing supply and demand for people at every stage of the life cycle.</p> <p><u>Housing planning can be used as a tool to address or prevent a serious mismatch between housing supply and demand for people at every stage of the life cycle.</u> In the midst of a strong market, it can be hard to find space to step back and think about overarching issues. Yet, communities that undertake local housing planning, such as that done through <a href="#">Homes for a Changing Region</a>, benefit from a clear vision of the types of housing needed by the community, and can be less reactive to new proposals.</p>			
<p><b>Submarket 8</b></p> <p><u>The housing stock of communities should accommodate households of various sizes and income levels.</u> Housing stock that is uniform in both its size and type can result in missed opportunities for communities to attract new residents and jobs. While most of the submarket’s housing stock consists of newer single-family homes, communities have an opportunity to increase the diversification of their housing stock through new development or retrofitting existing stock. An increase in the mix of housing types can appeal to a wider buyer pool and allow submarket 8 communities to remain competitive as market conditions change.</p> <p><b>Strategies</b></p> <p><b>Value of housing planning</b></p> <p>Municipalities should invest in long-term planning to identify policies and tools that prepare its housing stock for the future.</p> <p><u>Municipalities should invest in long-term planning to identify policies and tools that prepare its housing stock for the future.</u> Via planning tools like the <a href="#">Homes for a Changing Region Toolkit</a>, municipalities can better understand current and future housing needs in their communities and develop strategies to move toward a more “balanced” housing stock. Around the region, communities have been drawing on the principles of accessibility and sustainability to create healthier and safer housing. Plainfield’s experience in housing development is instructive as well as its <a href="#">density bonus program</a>, which provides an increase in residential density above a base level if a given development meets one or more of 15 village objectives. Community “buy in” regarding balanced housing is more likely to occur if a community creates a housing committee similar to those created by <a href="#">Highland Park</a> and <a href="#">Lake Forest</a>. Municipalities that are interested in incorporating greater accessibility/visitability standards into new development or rehab of existing single-family homes should review Bolingbrook’s <a href="#">accessibility/visitability requirements</a>.</p>

Potential for rapid neighborhood change	✓		

## Submarket 2

Proximity of submarket 2 to submarkets 3 and 7 increase the potential for rapid change. Submarket 2 often abuts higher income or rapidly developing areas (i.e. submarkets 3 or 7). Market specialists think that the pressure on submarket 2 to change will not abate since these areas are often close-in with good job and transit access and a form attractive to many households.

### Strategies

#### Adaptive reuse

Reusing existing buildings can help lower development costs and create affordable options.

Reusing existing buildings can help lower development costs and create affordable options. The age of the buildings in submarket 2, including the presence of large older industrial or commercial buildings, lends itself adaptive reuse, such as the [Karcher Artspace Lofts](#) in Waukegan.

#### Affordability through reduced parking

Reducing parking requirements can help to keep housing costs attainable.

Reducing parking requirements can help to keep housing costs attainable. Providing parking costs money. Higher sales prices or rents must support those costs. The more parking required by the municipality, the more expensive the development. For communities looking to preserve affordability or help create new housing at more affordable prices, reducing or eliminating parking requirements can help. In Chicago, the [Transit-Oriented Development Ordinance \(TOD\)](#) reduces or eliminates parking requirements near transit while density bonuses for developers who take advantage of the provisions. Many believe that this requirement has helped amplify the rental development boom in strong markets like Logan Square and the West Loop, opening up previously undevelopable parcels for action. In [Libertyville](#), developers can cash out their parking requirements, paying the village a fee in lieu of parking not provided on-site.

#### Community leadership

Strong local community groups can help involve existing residents in guiding the future of their neighborhood.

Strong local community groups can help involve existing residents in guiding the future of their neighborhood. Local institutional infrastructure also plays an important role in helping manage neighborhood change. For example, the [Pilsen Land Use Committee](#) offers neighborhood residents a forum to discuss potential new developments. Its role as a respected partner by many local non-profits, institutions, and government officials ensures that it can both represent local views and be involved in the decision-making process.

#### Inclusionary zoning

Communities can use strong markets to create affordable housing.

Communities can use strong markets to create affordable housing. Some parts of submarket 2 are already changing rapidly. Inclusionary zoning efforts naturally work well in strong markets, leveraging new market rate units to add affordable units too. Many communities in the region have adopted inclusionary zoning ordinances, including [Chicago \(ARO\)](#), [Evanston](#), [Highland Park](#), and [Lake Forest](#).

Issue	2	6	8
<p><b>Affordable requirements ordinance (ARO):</b> Chicago adopted a <a href="#">new inclusionary housing ordinance</a> in 2015. A number of stakeholders identified potential positives and negatives in the ARO. Yet, because the ordinance is so new, it remains to be seen how market rate developers will comply. Monitoring its implementation will help other communities understand whether it will serve as a model.</p> <p><b>Land trusts</b> Land trusts can provide affordable housing in perpetuity by owning land and leasing it to those who live in houses built on that land. <u>Land trusts can provide affordable housing in perpetuity by owning land and leasing it to those who live in houses built on that land.</u> Land trusts, like those operating in <a href="#">Chicago</a> and the <a href="#">North Shore</a>, are often an effective tool in helping preserve currently affordable units due to a land trust’s unique ownership structure. When a land trust sells a unit to an owner, they only sell the improvements (i.e. the home), but not the land underneath. By selling only the improvements, the purchaser can pay far less for a home.</p> <p><b>Preservation and expansion of affordable housing</b> Preserving affordable housing options can help existing residents stay in changing neighborhoods. <u>Preserving affordable housing options can help existing residents stay in changing neighborhoods.</u> Ensuring existing residents have an opportunity to remain even as a neighborhood changes requires dedicated programs to preserve low cost units. For example, Chicago passed the <a href="#">Single-room Occupancy Preservation Ordinance</a> in 2014, highlighting the value of municipal intervention to preserve a targeted unit type. Similarly, the work in <a href="#">Albany Park</a> highlights the value of targeted work by local non-profits to preserve units in areas on the cusp of rapid change.</p> <p><b>Value of housing planning</b> Using tools like Homes for a Changing Region can be valuable. <u>Using tools like Homes for a Changing Region can be valuable.</u> Since the issues of greatest concern in submarket 2 neighborhoods depends heavily on the proximity of other submarkets and the strength of the market in those areas, local housing planning, such as that done through <a href="#">Homes for a Changing Region</a>, is very valuable.</p>			
<p><a href="#">Prioritization</a></p>	<p>✓</p>		
<p><b>Submarket 2</b></p> <p><u>How much a community focuses on housing issues in submarket 2 depends on context.</u> Some communities focus on the housing issues in submarket 2 more than others. The emphasis likely depends on the mix of submarkets in a local community along with capacity. Municipalities with more vibrant housing markets or more distressed areas may not choose to focus on housing issues in this submarket, viewing it as stable.</p> <p><b>Strategies</b></p>			

	Submarkets with primary focus		
Issue	2	6	8
<p><b>Resource targeting</b></p> <p>Targeting resources can increase their impact.</p> <p><u>Targeting resources can increase their impact.</u> Submarket 2 neighborhoods often attract funding to address local issues because of evidence of distress, like more foreclosures and high levels of cost burden. To ensure those resources maximize impact, communities, program operators, and funders should explore how to work closely in targeting those resources, as was done by Evanston with its <a href="#">Neighborhood Stabilization Program</a> or Chicago with its <a href="#">Micro-Market Recovery Program</a>.</p> <p><b>Value of housing planning</b></p> <p>Using tools like Homes for a Changing Region can be valuable.</p> <p><u>Using tools like Homes for a Changing Region can be valuable.</u> Since the issues of greatest concern in submarket 2 neighborhoods depends heavily on the proximity of other submarkets and the strength of the market in those areas, local housing planning, such as that done through <a href="#">Homes for a Changing Region</a>, is very valuable.</p>			
Rehabilitation challenges	✓		
<p><b>Submarket 2</b></p> <p><u>Rehab programs may be underutilized.</u> In response to deferred maintenance and code issues, many organizations operate housing rehabilitation programs. Yet, these programs are not always heavily used. The cost of bringing a unit up to code may exceed available funding, limiting the utility of the program to local residents. On the other hand, in some areas of Submarket 2, market pressures may make rehab more financially feasible.</p> <p><b>Strategies</b></p> <p><b>Approach to rehabilitation</b></p> <p>Municipal rehab programs can help certain residents address issues of deferred property maintenance.</p> <p><u>Municipal rehab programs can help certain residents address issues of deferred property maintenance.</u> Municipalities, counties, and non-profits have developed many different models for how to operate local rehabilitation programs. The key to success is choosing a structure that matches the size and scope of the code issues in the targeted community <i>and</i> matches the financial condition of building owners. <a href="#">Read more</a> about the many different models of rehabilitation programs in the region.</p>			
Tenure changes	✓		
<p><b>Submarket 2</b></p> <p><u>Units may be changing from owner-occupied to renter-occupied.</u> In some ways, the change in tenure is beneficial: the market is finding ways to ensure that foreclosed units do not remain vacant. Yet, the change in tenure can have many impacts. More rental units may challenge the ability of communities to effectively monitor and manage the local rental stock due to the rapid increase in the number of rental units. Such changes may also signal financing challenges, leaving potential owners as renters.</p>			

Issue	Submarkets with primary focus		
	2	6	8
<p><b>Strategies</b></p> <p><b>Rental unit monitoring and regulation</b></p> <p>Effective municipal regulation, coupled with pro-active strategies and incentives, can improve rental quality and reduce problems.</p> <p><u>Effective municipal regulation, coupled with pro-active strategies and incentives, can improve rental quality and reduce problems.</u> With the number of rental properties in submarket 2, municipalities need to review the structure of their rental unit monitoring and regulation efforts to make sure that they are effectively maintaining the quality of the local rental stock in accordance with state law. Municipalities may want to consider implementing a performance-based rental regulation ordinance such as the one in place in the <a href="#">Village of Addison</a>. Municipalities may also want to point owners of multifamily rental property to the abundance of resources at the <a href="#">Community Investment Corporation (CIC)</a> for financing, energy efficiency, and property management training. <a href="#">Learn about best practice rental regulation strategies.</a></p>
