

## Robbins

<https://www.regionalhousingsolutions.org/municipality/robbins>

### Submarkets (What is a submarket?)

■ **75% of Robbins is in Submarket 5.**

Suburban 1960-79 housing stock, moderate but declining incomes, lower cost stock

■ **25% of Robbins is in Submarket 1.**

Higher density urban, high foreclosure and vacancy, low income

Areas with a similar combination of these submarkets:

Alsip	Harvard	Palos Hills
Beach Park	Hazel Crest	Posen
Bensenville	Hebron	Prospect Heights
Big Rock	Hickory Hills	Richmond
Braidwood	Hodgkins	Rosemont
Burnham	Holiday Hills	Sauk Village
Calumet City	Justice	South Chicago
Crestwood	Kaneville	Heights
Dixmoor	Lansing	Steger
Dolton	Lynwood	Thornton
East Hazel Crest	Maple Park	University Park
Elk Grove Village	Marengo	Virgil
Ford Heights	McCook	Wheeling
Fox Lake	Merrionette Park	Willowbrook
Glenwood	Oak Forest	Wood Dale

Want to find housing data for your community? Download [U.S. Census housing data](#) and use the [Homes for a Changing Region data guide](#) to analyze it.

## Issues + strategies

Most communities have multiple submarkets within their boundaries. The issues facing each submarket as well as strategies tailored to address them are outlined below.

	Submarkets with primary focus	
Issue	1	5
<a href="#">Attracting investment</a>		✓

### Submarket 5

Communities will need to develop creative strategies to attract additional investment and development.

Incentivizing infill can be difficult in mostly built-out areas. Many financial institutions do not provide mortgage products for homes at lower price points, limiting the ability to attract new families into some neighborhoods. Rehab may be needed in some areas, but homeowners may not be able to tap into equity loans because of poor market conditions. High property tax rates in some communities prohibit investment and limit affordability.

#### Strategies

##### Approach to rehabilitation

Municipal rehab programs can help certain residents address issues of deferred property maintenance.

Municipal rehab programs can help certain residents address issues of deferred property maintenance.

Municipalities in Cluster 5 may consider developing rehab grant or loan programs for certain income-qualified homeowners. Many municipalities around the region have developed these programs, some with the support of federal Community Development Block Grant (CDBG) funding ([Oak Park](#), [Evanston](#)) and others through their own municipal sources ([East Dundee](#)). [Neighborhood Lending Services, Inc. \(NLS\)](#) offers fixed rate home improvement loans in certain areas of the region. Municipalities in these areas should assist NHS with marketing to residents. Municipalities may also want to consider partnering with local banks to explore the development of a rehab financing product for their residents. [Read more about the many different models of rehabilitation programs in the region.](#)

##### Land banking

Land banks can be used as a strategic tool to acquire problem vacant properties and convert them into assets.

Land banks can be used as a strategic tool to acquire problem vacant properties and convert them into assets. Land banks are governmental entities or nonprofit corporations that focus on the conversion of

	Submarkets with primary focus	
Issue	1	5
<p>vacant, abandoned and tax delinquent properties into productive use and have proved to be a useful tool to help reinvent and revitalize neighborhoods. Most vacant and abandoned properties have many legal and financial barriers, such as years of back taxes and clouded title that make it difficult to attract investors. Land banks have the ability to hold land tax-free and clear title and/or extinguish back taxes, which can be essential when trying to attract buyers and investment. Land banks can work in partnership with municipalities to advance community-based goals. There are two successful examples of land banks in Illinois, in both the <a href="#">south suburbs</a> and <a href="#">Cook County</a>, and other areas of the region struggling with issues of vacancy and blight might consider the use of land banking as a tool in their community. The <a href="#">Center for Community Progress</a> is a good starting point to learning about land banking. <a href="#">Learn more about strategies to deal with vacant property.</a></p> <p><b>Placemaking and marketing strategies</b></p> <p>Communities should develop strategies to create greater neighborhood identity in order to encourage additional private sector investment.</p> <p><u>Communities should develop strategies to create greater neighborhood identity in order to encourage additional private sector investment.</u> Municipalities can make a concerted effort to enhance neighborhood character in Submarket 5 through strategic public investments such as neighborhood branding/signage, streetlights, sidewalks, etc. Public sector investment will likely signal to the private market a commitment to an area and make it more attractive for additional resources. <a href="#">Learn about placemaking strategies.</a></p> <p><b>Review regulations affecting real estate development</b></p> <p>To better compete for private market real estate investments, communities can preemptively inventory and update development regulations.</p> <p><u>To better compete for private market real estate investments, communities can preemptively inventory and update development regulations.</u> Development regulations protect community health, character, and safety, but can also sometimes be outdated or create unintended barriers to private investment. Some regulations are especially onerous and limit developer interest in investment, while others prohibit forms of development the community may wish to allow. For instance, density limitations may prohibit condo buildings in communities' historic downtowns. Large minimum lot sizes may prevent the development of starter homes or housing for older community residents. Similarly, point-of-sale requirements may excessively extend home sale transaction timelines. Communities should audit and potentially refresh existing regulations to ensure that they are not creating unintended or unnecessary barriers to development. Assistance may be available through the <a href="#">Urban Land Institute</a> or local associations of realtors to help evaluate perceptions among private market actors of the difficulty of working in the community.</p>		
Code issues	✓	✗
<p><b>Submarket 1</b></p> <p><u>Striking a balance between code enforcement to protect health and safety and the reality of existing building conditions can be challenging.</u> Many properties in Submarket 1 are more than 75 years old and not in compliance with regulations that ensure the health and safety of residents, including children who may</p>		

	Submarkets with primary focus	
Issue	1	5
<p>be exposed to lead paint. Finding the right balance for addressing code issues is key for local leaders in these communities. Too aggressive enforcement can lead to vacancy and reduce neighborhood stability because building owners cannot afford to make all required repairs. Too lenient enforcement can lead to households living in unsafe or unsanitary conditions. The results of either approach compound over time and can serve as a deterrent to future permitted, market-driven rehabilitation.</p> <p><b>Strategies</b></p> <p><b>Approach to rehabilitation</b></p> <p>Municipal rehab programs can help residents address issues of deferred property maintenance.</p> <p><u><i>Municipal rehab programs can help residents address issues of deferred property maintenance.</i></u> Municipalities, counties, and non-profits have developed many different models for how to operate local rehabilitation programs. The key to success is choosing a structure that matches the size and scope of the code issues in the targeted community <i>and</i> matches the financial condition of building owners. <a href="#">Read more</a> about the many different models of rehabilitation programs in the region. In this market, grants may be the best approach.</p> <p><b>Rental unit monitoring and regulation</b></p> <p>Effective municipal regulation, coupled with pro-active strategies and incentives, can improve rental housing quality and reduce problems.</p> <p><u><i>Effective municipal regulation, coupled with pro-active strategies and incentives, can improve rental housing quality and reduce problems.</i></u> Renters make up the largest group of households in Submarket 1. Due to challenges with the age and physical condition of buildings in Submarket 1 neighborhoods, communities may have concerns about the quality of the existing rental stock. Rental unit monitoring and regulation can help ensure good management of local apartments. In order to maximize their authority under state law, municipalities need to review the structure of their existing rental unit monitoring and regulations. Municipalities may want to consider implementing a performance-based rental regulation ordinance such as the one in place in the <a href="#">Village of Addison</a>. Municipalities may also want to point owners of multifamily rental property to the abundance of resources at the <a href="#">Community Investment Corporation (CIC)</a> for financing, energy efficiency, and property management training. <a href="#">Learn about best practice rental regulation strategies.</a></p> <p><b>Submarket 5</b></p> <p><u><i>Finding a balance between too aggressive and too lenient code enforcement can be difficult.</i></u> In some parts of Submarket 5, where the market is weaker, communities struggle to find the right balance in addressing code issues. Too aggressive enforcement can lead to vacancy and reduced neighborhood stability because building owners cannot afford to make all the repairs. Burdensome point of sale requirements may deter new investment in the community, and challenges with staff capacity can often result in long waiting periods to complete required inspections. On the other hand, too lenient enforcement can lead to deteriorating property conditions and households living in unsafe or unsanitary homes. The results of either approach compound over time and can serve as a deterrent to future market-driven rehabilitation.</p> <p><b>Strategies</b></p>		

	Submarkets with primary focus	
Issue	1	5
<p><b>High priority property maintenance liens</b></p> <p>Municipalities should utilize priority liens to recover costs incurred for securing and maintaining abandoned residential property.</p> <p><u><i>Municipalities should utilize priority liens to recover costs incurred for securing and maintaining abandoned residential property.</i></u> Illinois law allows for priority liens for securing and maintaining abandoned residential property. The law applies to any type of permanent dwelling unit that has been unoccupied for at least 90 days and for which the municipality attempted to contact the owner(s) or the owner’s agent(s) but was unable to reach anyone. It covers the removal of weeds, trees, bushes, grass, garbage, debris, or graffiti, and securing or enclosing the property. Liens obtained under this law are superior to all other liens, except taxes. Under this law, municipalities recover their expenses after taxes are paid but before the mortgage is recovered. Thus, municipalities will recover even when the value of the property is less than the value of the mortgage. If municipalities are maintaining vacant property in their community, they should be sure to go through the necessary steps to file a high priority lien on the property. The Metropolitan Mayors Caucus and Business and Professional People for the Public Interest’s (BPI) publication on <a href="#">Vacant Building Ordinances</a> provides detailed information and step-by-step guidance on this process. <a href="#">Learn more about strategies to deal with vacant property.</a></p> <p><b>Rental unit monitoring and regulation</b></p> <p>Effective municipal regulation, coupled with pro-active strategies and incentives, can improve rental housing quality and reduce problems.</p> <p><u><i>Effective municipal regulation, coupled with pro-active strategies and incentives, can improve rental housing quality and reduce problems.</i></u> With the number of rental properties in this Submarket, municipalities need to review the structure of their rental unit monitoring and regulation efforts to make sure that they are maximizing authority under state law while effectively maintaining the quality of the local rental stock. Municipalities may want to consider implementing a performance-based rental regulation ordinance such as the one in place in the <a href="#">Village of Addison</a>. Municipalities may also want to point owners of multifamily rental properties to the abundance of resources at the <a href="#">Community Investment Corporation (CIC)</a> for financing, energy efficiency, and property management training. <a href="#">Learn about best practice rental regulation strategies.</a></p> <p><b>Strategic code enforcement on vacant properties</b></p> <p>Code enforcement departments should create targeted intervention strategies based on certain property characteristics.</p> <p><u><i>Code enforcement departments should create targeted intervention strategies based on certain property characteristics.</i></u> Maintenance of vacant and abandoned property is important in order to not deter additional investment in a neighborhood. Some municipalities have reported that boarding vacant properties actually discourages neighborhood investment and the best strategy is to make a property appear occupied. Code enforcement departments should maintain vacant property to the best of their ability and issue priority property maintenance liens as necessary. Even sending a notice to a property owner that a priority lien will be issued may encourage an owner to pay past fines or start taking an interest in the property. However, it is important for code enforcement departments to also make a plan when it is clear that the owner of a property is no longer being responsive. Outlining a strategy to identify properties that may need more aggressive intervention is important. At a certain point when the owner is no longer responding it may be more cost efficient in the long run to intervene with a more aggressive strategy. Communities must be willing to utilize the full arsenal of enforcement tools, including demolition or declaration of abandonment, if necessary. <a href="#">Learn more about strategies to deal</a></p>		

	Submarkets with primary focus	
Issue	1	5
<p>with vacant property.</p> <p><b>Utilize demolition, fast-track, and abandonment authority</b>  More aggressive strategies may be needed when owners become unresponsive.</p> <p><u>More aggressive strategies may be needed when owners become unresponsive.</u> When it is clear an owner of a vacant property is no longer being responsive, municipalities should consider more aggressive strategies. The Metropolitan Mayors Caucus and BPI's publication on <a href="#">Vacant Building Ordinances</a> provides detailed information and step-by-step guidance on abandonment, fast track demolition, and declaration of abandonment. Some south suburban municipalities have used their abandonment authority to take control of problem properties and then partner with the <a href="#">South Suburban Land Bank</a> to transfer ownership of these properties to responsible owners. The <a href="#">Village of Lansing</a> has been using abandonment petitions to gain control of vacant properties, reduce strain on municipal resources, and attract investment. <a href="#">Learn more about strategies to deal with vacant properties.</a></p>		
Foreclosure	✓	
<p><b>Submarket 1</b></p> <p><u>Although filings have slowed down, foreclosures are still more common in Submarket 1 communities than elsewhere in the region.</u> In Illinois, foreclosure is a long process, generally taking many months—if not years—from the initial filing to the final disposition of the foreclosed property. In many instances, properties stand empty for long periods after residents are evicted but before the foreclosure is resolved. Long-term vacancy accelerates physical deterioration as property security and maintenance decline. Blighted foreclosures threaten community safety and quality of life by triggering declines in nearby property values and increased incidences of arson, vandalism, and other crimes.</p> <p><b>Strategies</b></p> <p><b>Dealing with foreclosure</b>  Local supports can help families and individuals impacted by foreclosure.</p> <p><u>Local supports can help families and individuals impacted by foreclosure.</u> Foreclosure continues to be an issue throughout Submarket 1 communities. Local officials, non-profits, and community institutions should become acquainted with local HUD-certified housing counseling agencies in order to connect residents with counseling resources, including mortgage delinquency and foreclosure prevention options. <a href="#">Housing Action Illinois</a> can introduce communities to available counseling programs and services for owners. Renters are also adversely affected by foreclosure, often suffering deteriorating building conditions and ultimately eviction. To protect renters, communities may wish to explore local rules similar to the <a href="#">Keep Chicago Renting Ordinance</a> to establish rights for tenants during foreclosure.</p> <p><b>High priority property maintenance liens</b>  Municipalities should utilize priority liens to recover costs incurred for securing and maintaining abandoned residential property.</p> <p><u>Municipalities should utilize priority liens to recover costs incurred for securing and maintaining abandoned residential property.</u> Illinois law allows for priority liens for securing and maintaining</p>

<p>Growing senior population</p>	<p>✓</p>	
<p><b>Submarket 1</b></p> <p><u>As local homeowners age, there is a need for appropriate senior housing as well as a pipeline of purchasers for the family homes they are leaving behind.</u> Older adults in Submarket 1 may have trouble accessing reasonably priced housing appropriate for their changing needs, like accommodations for limited mobility. Retrofitting resources along with additional local housing options for seniors are critical to keeping these long-tenured residents in the community. At the same time, developing a pipeline of new owners to take over vacated housing is also important, creating a potential matchmaking role for elected officials, nonprofits, and other institutional actors in Submarket 1.</p> <p><b>Strategies</b></p> <p><b>Meeting the needs of aging residents</b>  As the region ages, it is critical for communities to address the housing needs of older adults.</p>		

	Submarkets with primary focus	
Issue	1	5
<p><u>As the region ages, it is critical for communities to address the housing needs of older adults.</u> Many homeowners in Submarket 1 are aging and in need of high quality housing options that fit their current stage in life. Inside the City of Chicago, low-income seniors who wish to age in place in their longtime homes can secure home modification assistance through the <a href="#">Small Accessible Repairs for Seniors (SARFS)</a> program, which provides grab bars, lever faucets, door repairs, and wheelchair ramps for qualified owners. Federally subsidized apartment buildings limited to seniors can also offer important options for older residents on a fixed income. Finally, communities should also allow diverse living arrangements, including “Families of choice” (groups of individuals who are not biologically related but live together and share a kitchen), multigenerational housing, and housing options for older adults and caregivers to live together. <a href="#">Learn more strategies for creating age-friendly neighborhoods.</a></p>		
Legacy of disinvestment	✓	
<p><b>Submarket 1</b></p> <p><u>Long-term flight of residents and capital from communities can create barriers to reinvestment.</u> Many communities in Submarket 1 suffer from the long-term loss of businesses and residents, resulting in local populations considerably lower than peak levels reached in the 20th century. Over time, this supply-demand mismatch—exacerbated by related issues like high rates of foreclosure and the historical legacy of racially discriminatory real estate practices—contributed to widespread vacancy and disinvestment in Submarket 1. Prolonged disinvestment drives property abandonment, resulting in demolition in many cases. While demolition may represent an immediate benefit to surrounding residents, high rates of demolition can also create new challenges by disrupting the fabric of the neighborhood.</p> <p><b>Strategies</b></p> <p><b>Adaptive reuse</b>  <small>Opportunities exist to reimagine obsolete buildings as housing or other community amenities.</small>  <u>Opportunities exist to reimagine obsolete buildings as housing or other community amenities.</u> The presence of large older industrial or commercial buildings lends itself adaptive reuse. Recent regional examples of adaptive reuse for housing include the <a href="#">Karcher Artspace Lofts</a>, <a href="#">Goldblatt’s Senior Living</a>, <a href="#">Pullman Wheelworks</a>, and <a href="#">Town Hall Apartments</a>. Adaptive reuse helps to preserve the architectural heritage of communities while providing new uses in unused spaces.</p> <p><b>Affirmative marketing</b>  <small>Since Submarket 1 communities may suffer from unfounded reputation issues, efforts to showcase the community’s assets may help attract new residents and investment.</small>  <u>Since Submarket 1 communities may suffer from unfounded reputation issues, efforts to showcase the community’s assets may help attract new residents and investment.</u> However, any marketing campaign must be based in frank self-assessment of existing assets and market realities. The <a href="#">“Why Berwyn?” campaign</a> provides a good example of an asset-based approach to community marketing.</p> <p><b>Dealing with foreclosure</b></p>		

	Submarkets with primary focus	
Issue	1	5
<p>Local supports can help families and individuals impacted by foreclosure.</p> <p><u>Local supports can help families and individuals impacted by foreclosure.</u> Foreclosure continues to be an issue throughout Submarket 1 communities. These plans may include market analysis to help guide communities toward market-feasible development.</p>		
Proximity		⌵
<p><b>Submarket 5</b></p> <p><u>Communities may have an opportunity to build off of nearby assets.</u> Submarket 5 spans a wide geography across the region, and in many areas there is bordering proximity to assets such as strong school districts and transit lines. Communities within submarket 5 should closely evaluate the relationship of their submarket to other submarkets and assets to take advantage of potential opportunities to attract investment.</p> <p><b>Strategies</b></p> <p><b>Value of housing planning</b>            Using tools like Homes for a Changing Region can be valuable.  <u>Using tools like Homes for a Changing Region can be valuable.</u> In order to determine which strategies to pursue most actively, Submarket 5 communities must establish a market feasible vision for future development. <a href="#">Homes for a Changing Region</a> is a very valuable tool that can help communities identify how to plan for the future of the local housing market and identify which strategies to prioritize.</p>		
Rehabilitation challenges	⬆	⌵
<p><b>Submarket 1</b></p> <p><u>In certain communities, the cost of renovation may exceed the value of the home or available rehab resources.</u> Some properties in Submarket 1 are in very poor physical condition, making it difficult to renovate them with limited public sector resources, and unfeasible with private sector resources. Banks struggle to underwrite renovation loans when the cost to bring a property up to a reasonable level of repair exceeds the potential sale price for the renovated home. For this reason, low values at</p>		

	Submarkets with primary focus	
Issue	1	5
<p>sale for homes across Submarket 1 constrain the potential of rehabilitation for particular homes.</p> <p><b>Strategies</b></p> <p><b>Approach to rehabilitation</b>  Municipal rehab programs can help residents address issues of deferred property maintenance.  <u><a href="#">Municipal rehab programs can help residents address issues of deferred property maintenance.</a></u>  Municipalities, counties, and non-profits have developed many different models for how to operate local rehabilitation programs. The key to success is choosing a structure that matches the size and scope of the code issues in the targeted community <i>and</i> matches the financial condition of building owners. <a href="#">Read more</a> about the many different models of rehabilitation programs in the region. In this market, grants may be the best approach.</p> <p><b>Submarket 5</b></p> <p><u><a href="#">Rehab programs may be underutilized.</a></u> In response to deferred maintenance and code issues, many communities operate housing rehabilitation programs. These programs are not always heavily used, in part, because the cost of bringing the house up to code exceeds the funding available.</p> <p><b>Strategies</b></p> <p><b>Approach to rehabilitation</b>  Municipal rehab programs can help certain residents address issues of deferred property maintenance.  <u><a href="#">Municipal rehab programs can help certain residents address issues of deferred property maintenance.</a></u>  Municipalities in Cluster 5 may consider developing rehab grant or loan programs for certain income-qualified homeowners. Many municipalities around the region have developed these programs, some with the support of federal Community Development Block Grant (CDBG) funding (<a href="#">Oak Park</a>, <a href="#">Evanston</a>) and others through their own municipal sources (<a href="#">East Dundee</a>). <a href="#">Neighborhood Lending Services, Inc. (NLS)</a> offers fixed rate home improvement loans in certain areas of the region. Municipalities in these areas should assist NHS with marketing to residents. Municipalities may also want to consider partnering with local banks to explore the development of a rehab financing product for their residents. <a href="#">Read more about the many different models of rehabilitation programs in the region.</a></p>		
Reputation	✓	
<p><b>Submarket 1</b></p> <p><u><a href="#">Negative perceptions about community conditions can constrain redevelopment potential.</a></u> Communities in Submarket 1 suffer from negative reputation issues, whether real or perceived, with the quality of the built environment, performance of local schools, proximity to amenities, and public safety.</p> <p><b>Strategies</b></p> <p><b>Affirmative marketing</b>  Since Submarket 1 communities may suffer from unfounded reputation issues, efforts to showcase the community's assets may help attract new residents and investment.</p>

	<p><u>Since Submarket 1 communities may suffer from unfounded reputation issues, efforts to showcase the community's assets may help attract new residents and investment.</u> However, any marketing campaign must be based in frank self-assessment of existing assets and market realities. The <a href="#">“Why Berwyn?” campaign</a> provides a good example of an asset-based approach to community marketing.</p>	
Weak market demand		✔

## Submarket 5

Declining home values put homeowners at risk. Homeowners in Submarket 5 may be particularly challenged due to declining housing values, which puts residents in this submarket the most at risk of having underwater mortgages.

### Strategies

#### Housing counseling

Communities should familiarize themselves with any HUD certified housing counseling agencies in their area and market their services to residents.

Communities should familiarize themselves with any HUD certified housing counseling agencies in their area and market their services to residents. [Housing Action Illinois](#) provides information about housing counseling agencies across the region, which provide an array of housing programs and services. Residents can get access to financial management and budget counseling, mortgage delinquency and default counseling, pre-purchase education, one-on-one homeownership counseling, rental information, fair housing guidance, rehabilitation programs, reverse mortgage counseling, homeless prevention support, predatory lending education, and foreclosure prevention options.

#### Placemaking and marketing strategies

Communities should develop strategies to create greater neighborhood identity in order to encourage additional private sector investment.

Communities should develop strategies to create greater neighborhood identity in order to encourage additional private sector investment. Municipalities can make a concerted effort to enhance neighborhood character in Submarket 5 through strategic public investments such as neighborhood branding/signage, streetlights, sidewalks, etc. Public sector investment will likely signal to the private market a commitment to an area and make it more attractive for additional resources. [Learn about placemaking strategies.](#)

#### Refinancing resources

Municipalities should market IHDA's I-REFI program to homeowners who may be underwater on their mortgage.

Municipalities should market IHDA's I-REFI program to homeowners who may be underwater on their mortgage. For homeowners with underwater mortgages, the Illinois Housing Development Authority (IHDA) is offering a new program designed to help homeowners who are current on their mortgage payments but owe more than their home is worth due to declining property values in their community. Through the new [I-REFI program](#), IHDA offers underwater homeowners up to \$50,000 in federal assistance to reduce the balance owed on their mortgage and refinance into a new affordable loan based on the current market value of their home. This program may be of particular relevance in
